

How to Access Data from Your Closest GPS Station from UNAVCO Website

1. Go to UNAVCO.org

2. Hover over the “Instrumentation” tab.

3. Click on the “Network Monitoring” at the bottom.

4. Under Networks of the Americas click on “NOTA GNSS/GPS Network”.

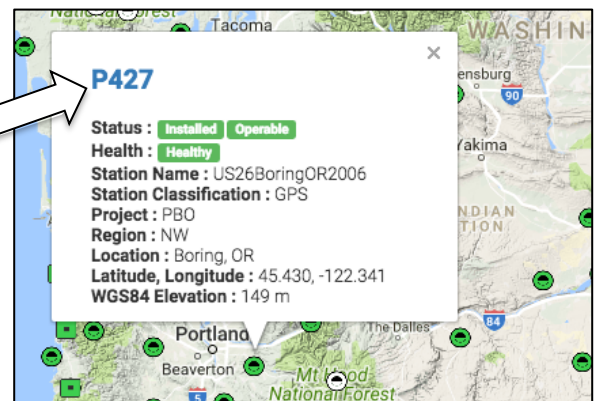

5. This brings you to a map. Zoom into the area closest to your location.

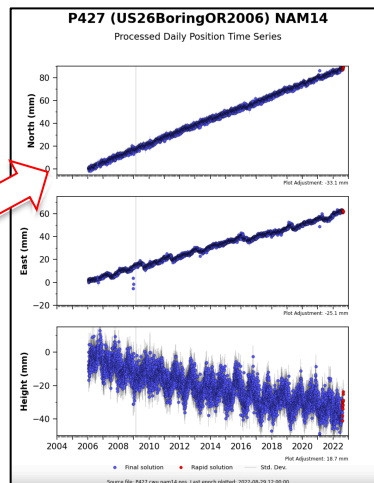

6. Click on the green dot closest to your location.

It will bring up a window showing information about the station.

7. Click on the Station ID:

8. On the Station Overview page, click on the “Station Position” image to bring up the most recent time series plot for the station. You can save the graph image by clicking on it to enlarge it and then right-click > Save Image.

time series plot for the station. You can save the graph image by clicking on it to enlarge it and then right-click > Save Image.

OR you can download the daily position files as a NAM CVS file, which can be opened in a spreadsheet program.
