

How To Make Flubber

Note that you'll need one batch for the glacier and a double batch for the Earth.

Ingredients for one batch:

- 2 mixing bowls
- Measuring cup and spoons
- 1 cup white glue
- 1 1/2 teaspoon borax
- Food coloring
- Warm water

Instructions for making flubber

- In the first mixing bowl, combine 3/4 cup warm water and 1 cup glue (and food coloring if needed). Stir until well mixed.
- In the second bowl, combine 2/3 cup warm water and 1 1/2 teaspoon borax.
- Combine the contents of the two mixing bowls (whip the materials together), and stir until a gooey blob forms. Flubber will be sticky for a moment or two. Let the excess liquid drip off.
