

Interpreted stratigraphic section from AI-04.05a

Interpretation

- a ravinement surface beneath shoal
- b offshore shoal ~1.5 m thick
- c ravinement exposed on seafloor
- d missing from section: overwash sheet, removed by ravinement
- e tidal channel (associated with flood-tidal delta)
- f flood-tidal delta, cross-bedded sand dipping landward
- h approximate base of Holocene sequence
- i deeper reflections obscured by gas
- GAS methane gas in sediment
- M multiples
