

Helpful Resources for Getting Started With GER

<http://serc.carleton.edu/index.html> : Science Education Resource Center, a great place to begin.

http://serc.carleton.edu/serc/site_guides/research_learn.html : Many helpful resources for research on teaching and learning.

http://apps.carleton.edu/governance/institutional_review_board/ : Good overview of IRB. Your institution likely has a similar website.

<http://nagt-ige.org/> : Find articles on current geoscience education research.

<http://www.microsirris.com/Statistical%20Decision%20Tree/> : A resource for deciding what statistical tests to use. Requires a basic knowledge of statistical terminology, but has a glossary.

http://serc.carleton.edu/NAGTWorkshops/GeoEd_Progress.html : A compilation of resources that are the foundation of geosed.

http://nagt.org/nagt/profdev/workshops/geoed_research/ger_resources.html : More GER resources.

<http://www.socialresearchmethods.net/kb/index.php> : A good online resource for social research methods.

<http://www.nap.edu/catalog/13362/discipline-based-education-research-understanding-and-improving-learning-in-undergraduate> : NSF- funded book on status, contributions and future direction of DBER
