

Preparing for the Voyage

PART B: Meet the Scientists on Board Expedition 341

1: The scientists on board the *JOIDES Resolution* are a team, all working together for a common goal. Based on your work in this activity, list the team members involved in the process of obtaining and analyzing a core sample beginning with lowering a section a pipe and ending with unloading the cores at the end of the expedition

2: If you were working on board the *JOIDES Resolution*, which job would you most like to have? Why?
