

# 2016 InTeGrate Course Form for Module Authors

The InTeGrate team is very interested to hear about how the materials we've developed are being used and adopted by our fellow educators. Please fill out one form for each course you have taught **since you piloted your materials** that has utilized InTeGrate materials.

We would like you to enter your name below. This will improve our ability to evaluate the InTeGrate project by allowing us to link information about your course to other evaluation instruments. Before sharing this information with anyone outside of our evaluation team, your name and comments will be removed. Other module authors will not see your name.

This survey should take about 5 minutes to complete for each course.
