

Resource Scavenger Hunt - Part 1

Rules and Instructions:

Use the internet, the knowledge of the group, or ask people on campus questions to determine the answers to each of the following questions. Then visit the correct location to pick up a code. Enter the given code into the blanks and perform the calculations to get the first half of the lock combination.

- All members of your group must be present in order to pick up the code (except for #2)
- Each team has 3 free answers the can be used either this morning or this afternoon. Turn one in to a peer mentor or Dr. LeAnn in exchange for the answer and location - you will still need to visit that location.
- The people with the codes may want to meet you and tell you about the resources they can provide for you. Be polite and don't rush them.

Question	Notes	Key
