# Implementation Planning

Implementing LR and MELs

- If you're here in a team:
  - What will implementing LR and MEL in your classrooms look like? What kinds of coordination will you need to do?
- If you're flying solo:
  - What components (LR or MEL) can you use? Are there ways to bring in the principles of the other into your classroom? Are there teammates at your school you could teach about LR and/or MELs?

Creating an Implementation Plan
