

Resources from **NAGT** for **FACULTY**

NAGT has a resources and professional development opportunities to support geoscience faculty in all institution types and at all stages of their careers.

Teaching

TEACH THE EARTH

The Teach the Earth website is a portal to thousands of peer-reviewed activities, course descriptions, and other resources that are searchable by subject and activity type. Faculty can also contribute activities and course descriptions to the collections.

TEACHING IN THE FIELD

Do you teach or do research with students in the field? This page collects all our resources about teaching in the field.

SUPPORTING UNDERGRADUATE STUDENTS

NAGT has a wide range of resources to help faculty support the development of undergraduate students.

SUPPORTING GRADUATE STUDENTS

NAGT has resources to help faculty support the development of graduate students.

Research

GEOSCIENCE EDUCATION RESEARCH

This set of resources about geoscience education research (GER) was developed by the community to facilitate getting involved in GER. They include a GER Toolbox, the NSF-funded community framework for GER, and many other resources to connect you to this community.

JOURNAL OF GEOSCIENCE EDUCATION

NAGT's research journal, the Journal of Geoscience Education, is an excellent venue for your own work as well as to find out more about new research. You can access the journal through your member login.

Community and Service

REGIONAL SECTIONS

Connect with others in your geographic region through the NAGT Sections. Sections may host local field trips and meetings, share resources, and advocate for local issues.

PROFESSIONAL INTEREST DIVISIONS

NAGT Divisions help to connect members with similar professional interests including teacher education, geoscience education research, and 2-year college instructors.

NAGT LEADERSHIP OPPORTUNITIES

Leadership opportunities exist in NAGT's committees, divisions, sections, and executive board. Find out more about these opportunities and [nominate yourself to get involved!](#)

Professional Development

EARTH EDUCATORS' RENDEZVOUS

The Earth Educators' Rendezvous is a biennial 5-day meeting that includes multi-day workshops, contributed talks and posters, short workshops, round table discussions, teaching demonstrations, plenary sessions, and working groups. This is the most fun and productive meeting you will go to!

WEBINARS

NAGT sponsors an active and varied webinar series that provides opportunities for you to learn from experts and your peers. Past webinars are archived for your use.

EARLY CAREER FACULTY RESOURCES AND WORKSHOP

NAGT provides in-depth resources for early career faculty related to teaching, research, and managing your career. The annual Workshop for Early Career Geoscience Faculty is held every summer and is for faculty in their first three years of a faculty position.
