GEOL 490 Virtual Field Geology

(3 credits) May 15th – June 4th

Use industry-standard software to model subsurface geology in 3-D. Learn how the extractive industries operate by digging out an active mine shaft and drilling for oil. Hone your orienteering skills in a virtual platform and learn how virtual field work complements boots-on-the-ground (or rovers-on-the-ground) science.

All-inclusive tuition and fees for this online-based course will be $2,052. Contact Erika Rader erader@uidaho.edu with questions
